

# Product Overview

## Farm

Date: Juli 2017

Organic farming becomes more and more important cause there is an increasing demand for bio products. The decrees of the European Union EG 834/2007 and EG 889/2008 applying to organic farming name the assumptions an agricultural produce has to fulfil to get the EU bio seal.

Beyond there is defined which kind of detergents and disinfectants are allowed to be applied, but on the other side there is no possibility to register such chemicals under a bio label. To guarantee a better transparency we've closed this gap ourselves by developing a company-internal logo meant for an immediate recognisability of bio-conform products.

Mainly products consisting of hardly treated basic chemicals like caustic soda, sodium hypochlorite, mineral acids, organic acids and similar substances are classified bio-conform by the decree regulating organic farming.

Very sensitive segments like purification and disinfection of milking installations and cow teats which are already featuring a very sophisticated level of product development as well as process safety are not subject to this requirement.

The washing-active agents contained in our products designed for these applications meet all requirements of detergent decree (EG) No. 648/2004 in terms of biodegradability.

The Calvatis bio logo allows a fast and safe identification of products to be considered appropriate for organic farming according to given EU guidelines.

The product complies with the requirements for use in organic farming in accordance with the regulations of EG 834/2007 and EC 889/2008. For the cleaning and disinfecting of milking facilities and the teats of the cow, all types of cleaning and disinfecting agents are permitted.

# Milking machine- liquid

**calgonit** quality products for the cleaning of milking and cooling systems, milking and milk dishes, cooling tanks and reservoirs.

## Alkaline chlorine-free

### calgonit RFS<sup>1</sup>

High caustic alkaline intensive cleaner suitable for automatic cleaning of technical equipment. The product is optimized to be used with all water hardnesses. calgonit RFS is for regular cleaning of milking systems and automatic milking systems and ideal for basic cleaning of milking systems as well. calgonit RFS is the optimal cleaner for thorough removal of deposits in liquid feeding devices, pipework of drinking troughs as well as (in concentrate) to fog with special nozzels in mixing tanks.

- ✓ hard water stable
- ✓ applicable at ambient temperatures
- ✓ excellent dissolving of fat and protein

## Alkaline with chlorine QAV-free

### calgonit DA Premium\*<sup>1</sup>

Liquid alkaline detergent concentrate based on active chlorine for daily cleaning and disinfecting of milking machines, milking equipment, milk cooling and collecting tanks.

- ✓ non foaming and suitable for all water conditions
- ✓ powerful disinfecting action

**Disinfection checked by DIN EN 1276/1650**

### calgonit TA\*<sup>1</sup>

Caustic, liquid cleaner with active chlorine for combined cleaning and disinfection of tube milking machines, milking equipment, cooling and collecting tanks. calgonit TA does not foam, contains a very effective hardness stabilizer and is therefore suitable for all water conditions.

- ✓ phosphate free and non foaming
- ✓ excellent disinfecting action

**Disinfection checked by DIN EN 1276/1650**

## Acidic

### calgonit S Premium\*

Low foaming liquid concentrate for acidic cleaning of milking machines, milking equipment, milk cooling and collecting tanks. Daily application alternating with alkaline products improves hygienic status of all milking equipment.

- ✓ removes milk stone and water scale
- ✓ low foaming

### calgonit TS<sup>1</sup>

Low foaming liquid product for acidic cleaning of milking machines, milking equipment, milk cooling and collecting tanks. The product removes very effectively milk stone and hard water deposits thus improving hygienic status of all milking equipment. calgonit TS is preferably used for automatic circulation cleaning.

- ✓ removes milk stone and water scale
- ✓ low foaming

# Milkin machine - powder

## Acidic

### calgonit Minoplus <sup>1</sup>

Powerful descaling agent for all mineral salts like limestone, rust etc. also organic Calcium salts like milkstone are removed easily. calgonit Minoplus is free of foam and can be easily rinsed off. The product is also suitable for descaling of bottle washing machines, cleaning of pipe milking machines and removal of mud in water circuits.

- ✓ fast and powerful descaling
- ✓ free of foam
- ✓ mild conditions
- ✓ economical in use

# Udder dip- and care products/hoofcare

## calgodip Osmo Duo\*<sup>1</sup>

2-component dipping agent based on chlorine dioxide which will be released after mixing of calgodip Osmo Duo Active and calgodip Osmo Duo Base. calgodip Osmo Duo makes the teat in free of germs and closes the streak canal. Thus prevents carry over of germs and ensures udder health. calgodip Osmo Duo contains skin care components and ensures smooth teats. calgodip Osmo Duo provides rapid kill of germs and defense of environmental and cow specific germs. This reduces mastitis rate and the risk of new diseases.

- ✓ excellent disinfecting effect
- ✓ rapid efficacy in high germ pressure
- ✓ with care formula to prevent dehydration of the teat skin
- ✓ quick drying barrier film

**Disinfecting effect tested according to DIN EN 1656**

## calgodip D 1200\*<sup>1</sup>

Iodine containing, ready-to-use teat dip and care preparation suitable for application after milking. The product closes the teat canal and protects it against invasion of bacteria. calgodip D 1200 contains effective skin care agents which regularly used reduce chapping and provide for smooth skin and excellent udder condition. Interrupts germ transfer and ensures good udder health.

- ✓ sprayable
- ✓ protects and conditions

**Disinfecting effect tested according to DIN EN 1656**

  
20 kg - Canister 75328407  
200 kg – Barrel 75328100

## calgodip D 3000\*<sup>1</sup>

Iodine containing, ready-to-use teat dip and care preparation suitable for application after milking. The product closes the teat canal and protects it against invasion of bacteria. calgodip D 3000 contains effective skin care agents which regularly used reduce chapping and provide for smooth skin and excellent udder condition. Interrupts germ transfer and ensures good udder health.

- ✓ improved formulation
- ✓ sprayable
- ✓ far better adhesion

Adopted in the list of plants for organic farming in Germany (FiBL Research Institute for Organic Agriculture)

**Disinfecting effect tested according to DIN EN 1656**

  
20 kg - Canister 75526400

200 kg – Barrel 75986100  
**InfoXgen®**

## calgodip Blue Kamille\*<sup>1</sup>

Ready-to-use teat care preparation of the new generation for dipping after every milking. calgodip Blue Kamille forms a non dripping and disinfecting barrier film around the teat. calgodip Blue Kamille contains skin protecting components and a well balanced amount of biological lactic acid. High quality care components make the skin resistant and supple. Contained chamomile soothes the teat skin.

- ✓ gives excellent skin condition and protection
- ✓ ensures udder health and milk quality
- ✓ iodine-free

**Disinfecting effect tested according to DIN EN 1656**

  
20 kg - Canister 75649401  
200 kg – Barrel 75649101

<sup>1</sup> The product complies with the requirements for use in organic farming in accordance with the regulations of EG 834/2007 and EC 889/2008. For the cleaning and disinfecting of milking facilities and the teats of the cow, all types of cleaning and disinfecting agents are permitted.

\* Use biocides safely. Always read the label and product information before use.

# Udder dip- and care products/hoofcare

## calgodip GREEN\*<sup>1</sup>

New generation, ready-to-use teat care agent for dipping after milking. The product closes the streak canal, forms a drip free barrier film around the teat and protects it against invasion of bacteria. calgodip Green contains skin protection agents and a balanced amount of biological lactic acid. High quality care components make the skin smooth and resistant.

- ✓ ensures udder health and milk quality
- ✓ forms protecting film
- ✓ economical in use
- ✓ iodine-free

**Disinfecting effect tested according to DIN EN 1656/1657**

## calgodip Amadine\*<sup>1</sup>

Ready-to-use teat care preparation for dipping after milking. calgodip Amadine forms a non dripping barrier film around the teat which protects the udder against invasion of bacteria. calgodip Amadine contains skin protecting components and a well balanced amount of biological lactic acid. High quality care components make the skin resistant and supple.

- ✓ gives excellent skin condition and protection
- ✓ ensures udder health and milk quality
- ✓ iodine-free

Adopted in the list of plants for organic farming in Germany (FiBL Research Institute for Organic Agriculture)

**Disinfecting effect tested according to DIN EN 1656**

## calgonit ER soft<sup>1</sup>

Surfactant based detergent concentrate for wet udder cleaning prior to milking. calgonit ER soft provides excellent cleaning efficiency, is odourless and gentle to skin due to a high content of skin care agents.

- ✓ very good cleaning
- ✓ high content of glycerine
- ✓ economical in use

## calgonit ER Foam<sup>1</sup>

Surfactant based detergent concentrate for wet udder cleaning prior to milking. calgonit ER foam provides excellent cleaning efficiency, is odourless and gentle to skin due to a high content of skin care agents.

- ✓ very good cleaning properties
- ✓ high content of glycerine
- ✓ economical in use

**ideal for  
teat-foam cleaning!**

## calgonit Premium CL\*<sup>1</sup>

Concentrated powder detergent for wet udder and teat cleaning with sanitation used prior to and after milking. calgonit Premium CL essentially reduces germ counts on the teat skin thus helping to ensure good milk quality.

- ✓ economical in use

# Foam cleaner

## Benefits of foam cleaning:

Excellent adhesion of the cleaning solution for a long time, even for smooth and vertical surfaces. The regular wetting of the surface to be cleaned is visually easy to establish.

## Alkaline chlorine-free

### calgonit NF 422

Highly active alkaline foam cleaner for difficult cleaning tasks. The product forms a stable, long clinging foam and is suitable for cleaning of machinery, conveyors, filling plants, walls and floors. calgonit NF 422 is particularly useful where fat, oil and protein soiling is encountered.

- ✓ phosphate free
- ✓ excellent cleaning action

24 kg - Canister  
72878411

235 kg - Barrel  
72878104

### calgonit Opti Clean

High performance liquid foam cleaner suitable for all surfaces resistant against mild alkalinity. calgonit Opti Clean is suitable for manual cleaning as well as a spray and high pressure cleaner for external cleaning of agricultural vehicles and machinery. Foam can be achieved using a proper foamizing equipment. calgonit Opti Clean removes even tenacious soil from vehicles, agricultural equipment, box bodies, awnings and side plankings.

- ✓ high detergency
- ✓ removes oil, fat and other tenacious soil
- ✓ economic in use

11 kg - Canister  
75956401

# Foam cleaner and Disinfectants

## Alkaline with chlorine QAV-free

### calgonit CF 310

Liquid alkaline foam detergent with active chlorine. It can be used to remove organic soil contaminants from machinery, containers, tiled walls and floors. calgonit CF 310 is hard water tolerant and can easily be rinsed off.

- ✓ removes tenacious soil
- ✓ stable foam
- ✓ economic in use
- ✓ phosphate-free

24 kg - Canister  
78174415  
235 kg - Barrel  
78174113

### calgonit CF 315

Liquid alkaline foam detergent with active chlorine. The product is suitable for all degrees of water hardness and contains a special inhibitor allowing the use on aluminium and galvanized steel. calgonit CF 315 removes effectively fat and protein as well as any other persistent, organic deposits. It leaves the cleaned surfaces in excellent hygienic condition. calgonit CF 315 is normally applied for foam cleaning of machinery, tanks, tiled walls and floors. The product gives a stable foam and is easily rinsed off. For basic cleaning of heavily soiled parts or containers calgonit CF 315 could be used for immersion cleaning.

- ✓ stable foam
- ✓ for all degrees of water hardness
- ✓ economic in use

24 kg - Canister  
75231400  
230 kg - Barrel  
75626100

## Acidic

### calgonit SF 520

Phosphoric acid based foam cleaner. The product produces, due to a special surfactant composition, a very stable, long cling foam and removes even tenacious soils like lime scale, rust and protein as well as residual alkalinity from previous cleaning steps. calgonit SF 520 produces hygienic clean and sparkling surfaces.

- ✓ economical in use

24 kg - Canister  
72895411  
250 kg - Barrel  
72895111

### calgonit SF 504

Ideal multi purpose, strong acidic foam cleaner. An optimized combination of powerful surfactants with mineral acids and emulsifying agents makes the product very effective for the removal of tenacious deposits of protein, grease and hard water scale. calgonit SF 504 is easy to remove from surfaces and leaves a shiny surface after rinsing.

- ✓ stable foam
- ✓ multi purpose use
- ✓ economic in use

24 kg - Canister  
75147405  
220 kg - Barrel  
75147100

## Disinfectants

### calgonit DS 625\*<sup>1</sup>

Liquid, slightly acidic disinfectant based on hydrogen peroxide and peracetic acid. It effectively kills bacteria, yeasts and fungi even at low temperatures. calgonit DS 625 does not foam and is therefore suitable for automatic disinfection of tanks, containers, pipelines and equipment.

- ✓ effective at low temperature
- ✓ broad spectrum kill
- ✓ economical in use

**Disinfecting effect tested according to DIN EN 1276/1650**

30 kg - Canister  
25121405

<sup>1</sup> The product complies with the requirements for use in organic farming in accordance with the regulations of EG 834/2007 and EC 889/2008. For the cleaning and disinfecting of milking facilities and the teats of the cow, all types of cleaning and disinfecting agents are permitted.

\* Use biocides safely. Always read the label and product information before use.

# Stable disinfectant / stable hygiene / claw care

## calgonit sterizid P12 DES\*

Concentrated stable sanitizer based on Glutaraldehyde and quarternary ammonium compounds for use as surface disinfectant in the animal husbandry. calgonit sterizid P12 DES is suitable for sanitation of stables, transport equipment, hygiene channels, disinfectant mats and boot cleaner. The product provides reliable effect against enveloped and non-enveloped viruses, bacteria and fungi. calgonit sterizid P12 DES is foam-free, biodegradable and suitable for ecologically-oriented animal husbandry.

- ✓ formaldehyd-free
- ✓ broad spectrum kill

**Disinfecting effect tested according to DIN EN 1276/1650/14349**

10 l - Canister  
75659403

## calgonit sterizid Kokzi PRO\*

Special surface disinfectant effective against parasite eggs. calgonit sterizid Kokzi PRO contains a lipid dissolving component which penetrates the very resistant envelopes of permanent forms of endoparasites like roundworm eggs and Coccidia Oocysts and kills them reliably. As a result calgonit sterizid Kokzi PRO prevents infection of the animals by parasites respectively transmission of pathogens from stable to the animal. calgonit sterizid Kokzi PRO is extremely effective against permanent forms of endoparasites like Coccidia Oocysts, Isospora species, lungworms, Gastrointestinal worms, Giardia, Cryptosporida as well as against bacteria, fungi and viruses. Mites and their eggs are dissolved.

- ✓ good material compatibility
- ✓ high effectiveness

**Disinfecting effect tested according to DIN EN 1656/1657/14204/13704/14675/14349**

10 kg - Canister  
25995400

## calgonit DS 680\*

Suitable for sanitation in food processing plants, kitchens, sanitary areas as well as vehicle sanitation. Typical areas of application are sanitation of floors, walls, washbasins, showers, toilets, gullies, cutting boards and any inventory. A complete wetting of all surfaces is achieved with surface active substances. This improves the disinfecting action. calgonit DS 680 is highly effective, has a broad microbicidal spectrum of activity and can be used at low temperatures. calgonit DS 680 is listed in the official recommendation list for epidemic control of the „Ministry of Agriculture, Fisheries and Food (MAFF)“ in England.

- ✓ economical in use
- ✓ effective at low temperatures
- ✓ bactericidal, fungicidal and virucidal

**Disinfecting effect tested according to DIN EN 1276/1650/1656/1657/14675**

20 kg - Canister  
72841405  
205 kg - Barrel

## calgosec Stalleinstreu

calgosec Stalleinstreu is a litter to keep hygienic conditions at move and lye down areas in the stable. It improves the air quality in the direct environment of the animals. calgosec Stalleinstreu absorbs humidity and has a pleasant odour. Thus improves the housing climate and relieves the respiratory tract of animals. calgosec Stalleinstreu binds manure without lump formation. The dry environment supports claw and hoof health and improves udder health. The product improves slip resistance of the ground and therefore the stability of the animals. The incidence of fly larvae and the growth of microorganisms are inhibited. calgosec Stalleinstreu is also suitable for walk-through basins as a "dry hoof bath". calgosec Stalleinstreu dries piglet skin and coat after birth and thus prevents the drop in body temperature. calgosec Stalleinstreu is also suitable for calf stables and calf hutches.

- ✓ improves stable climate
- ✓ keeps lye down areas dry
- ✓ economical in use
